New books 65, 179, 275, 373, 470

Abstracts

1 General analytical chemistry

1.1 Fundamentals, methods, apparatus, reagents, automation, data processing 67, 181, 277, 375, 472

1.2 Inorganic analysis (Elements, isotopes, ions, complex compounds) 75, 190, 286, 385, 480

1.3 Organic analysis (Elements, functional groups, compounds, structural analysis) 194, 291, 390, 485

2 Particular products and fields of application

2.1 Inorganic industrial products (Metals, reactor materials, salts, oxides, semiconductors, glass ceramics, builing materials, industrial solutions etc.) 79, 199, 394, 487

2.2 Organic industrial products (Coal, petroleum, petrochemical products, plastic, textiles, dyes, detergents, intermediate products, paper, leather, rubber etc.) 83, 202, 295, 397

2.3 Geological materials (Rocks, minerals, soils) 86, 299

2.4 Environmental matrices (Air, gases, waste gases, water, waste water, solid wastes etc.) 87, 205, 300, 400, 490

2.5 Agricultural-technical products (Fertilizers, plants, feeding-stuffs, wood etc.) 207, 306, 403, 494

2.6 Foods (Cereals, root crops, oil seeds, fruits, vegetables, animal products, spices, additives, beverages etc.; tobacco and tobacco products) 92, 209, 308, 406, 496

2.7 Pesticides 96, 312, 500

2.8 Pharmaceuticals and cosmetics 98, 212, 314, 409, 503

3 Biochemical and clinical analysis (General, elements, simple body substances, amino-acids, peptides, proteins, nucleic acids, lipids, steroids, hormones, enzymes etc.; drugs, toxic substances) 101, 215, 318, 412, 507
